

ROBOTUNITS®

SYSTEMATICALLY. BETTER. TOGETHER.

WORKBENCHES AND MATERIAL HANDLING SYSTEMS

Customized to your needs

WORKBENCHES AND MATERIAL HANDLING SYSTEMS

Customized solutions – from simple to complex

Whether in assembly, inspection, or packaging, simple design and streamlined workflows are essential for maximizing productivity. In doing so with the new Robotunits Workbench series: you can optimize ergonomics, integrate material flow and access necessary tools – in the most efficient way.

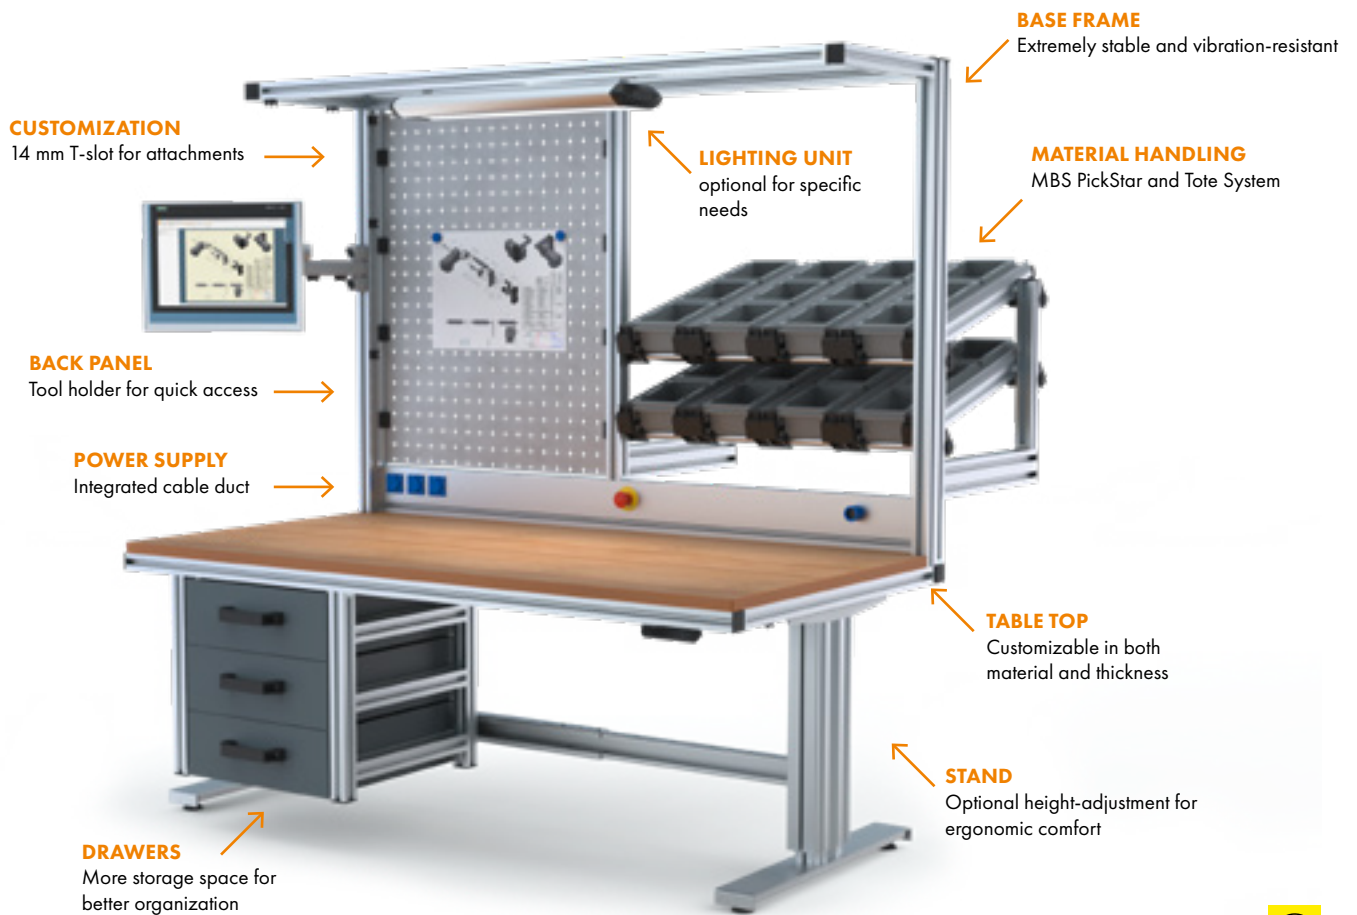

FACTS

- > Fully customizable in size, design, and function
- > Easy attachment of additional components
- > Compatible with the entire Modular Automation System

Robotunits workbenches provide exactly that: customized design, high stability, and virtually unlimited expansion options. These workstations are fully adaptable to your unique requirements and seamlessly integrate with the Modular Automation System.

BENEFITS

- > Enhanced ergonomics and optimal working conditions
- > Tailored to meet your specific needs
- > Seamless integration with material handling systems (MBS PickStar), conveyor technology, and more

Also available as an ESD version

Workbenches, MBS PickStar and Tote System:

Stand-alone or perfect combination

Our workbenches, material handling system (MBS PickStar) and Tote System offer unmatched flexibility for modern production environments. Designed to be both stable and customizable, the ergonomic workbenches can be configured as stand-alone units or integrated into comprehensive

automation solutions. When used together, they enhance workplace organization and ensure efficient, just-in-time material supply making sure that the right components are always available at the right time. The result: leaner processes and increased productivity.

WORKBENCHES AND MATERIAL HANDLING SYSTEMS

Perfect synergy for optimized work processes

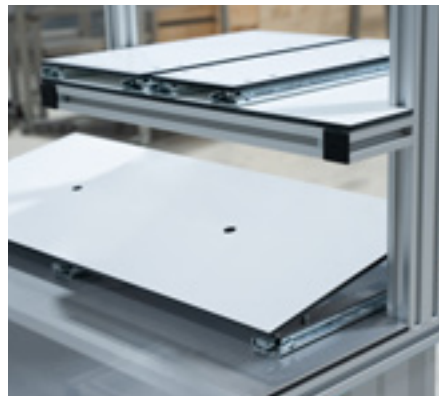

WORKBENCHES AND MATERIAL HANDLING SYSTEMS

Customized solutions

Workbench - heavy duty with stainless steel table top

Pull-out shelves

Workbench - adjustable via hand crank

Expansion possible via attachments using the 14 mm slot

Workbench with integrated belt conveyor

Flow Racks - combination of MBS PickStar and Totes

STANDARDIZED APPLICATION SOLUTIONS CUSTOMIZED TO YOUR NEEDS

The field-tested applications from the Robotunits Modular Automation System offer innovative solutions for the simple optimization of your processes.
