

Workbenches and Material Handling

The Robotunits Workbenches and Material Handling Systems:
customized to your needs.

Workbenches and Material Handling

Customized solutions – from simple to complex

Efficiency starts at the workplace! Wherever people are involved in a work process, ergonomics and lean production are crucial. Perfect sitting and standing heights, fast material flow, direct access to tools - everything counts.

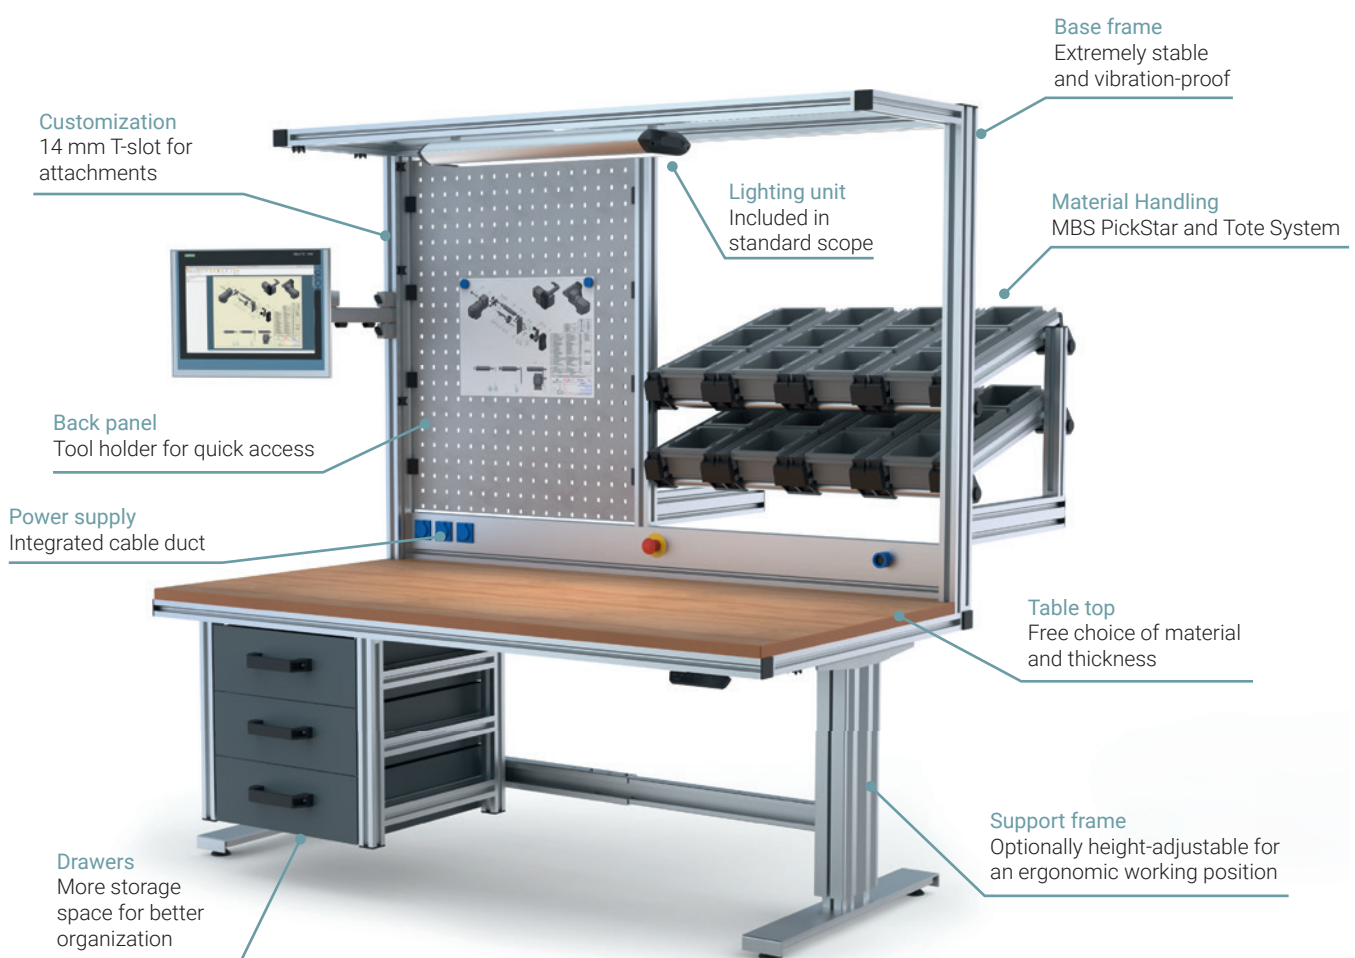

Facts

- Customized in size, design and function
- Flexible in terms of attachments and additions
- Can be combined with the entire Modular Automation System

The Robotunits workbenches offer just that: customized design, maximum stability and limitless expansion options. Perfectly adapted to your requirements and fully compatible with the entire Modular Automation System.

Benefits

- Optimal ergonomics and working conditions
- Specifically adapted to your products and needs
- Production integration, material handling system (MBS PickStar), conveyor technology

Also available as an ESD version

Workbenches, MBS PickStar and Totes: stand-alone or a perfect combination

Our Workbenches, Material Handling System (MBS PickStar) and Tote System offer maximum flexibility for modern production processes. The stable and adaptable Workbenches enable ergonomic working and can be individually configured. As stand-alone solutions, they can be used in a variety of ways; when combined,

they optimize workplace organization and ensure an efficient just-in-time material flow. This means that the right material is available at the right time - for lean processes and maximum productivity.

Workbenches and Material Handling

Perfect synergy for optimized work processes

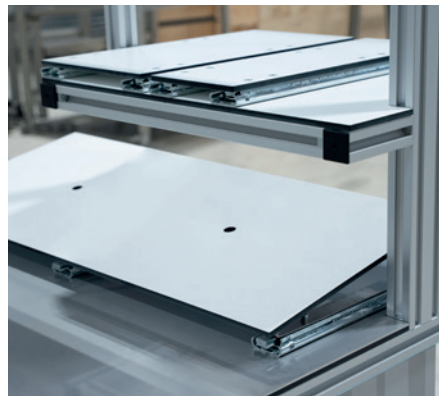

Workbenches and Material Handling

Customized solutions

Workbench - heavy duty with stainless steel table top

Pull-out shelves

Workbench - pivotable via hand crank

Expansion possible via attachments using the 14 mm slot

Workbench with integrated belt conveyor

Material trolley - combination of MBS and Totes

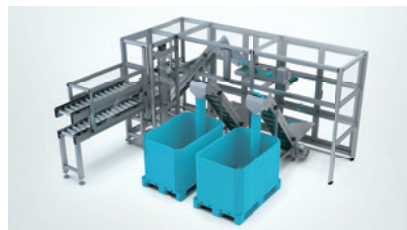

Standardized application solutions customized to your needs

The field-tested applications from the Robotunits Modular Automation System offer ingenious solutions for the simple optimization of your processes.
