FACTORY EQUIPMENT

FACTORY EQUIPMENT IN THE ROBOTUNITS WEBSHOP

ROBOTUNITS

A system is planned down to the last detail—the workshop around it usually just develops alongside it. For Robotunits customers, there's a better solution: Carts, work surfaces, and dividers are built using the same modular system as your Robotunits system, featuring Extrusion and Fastening Technology in the 40 mm series with a uniform 14 mm T-slot.

With all the advantages that make Robotunits so unique: a single supplier for system and factory equipment, a predictable price, and carts that you can order as kits or fully assembled. If the process changes, you simply retrofit your equipment instead of buying new.

IMPRESSIVE DELIVERY TIMES

- Available as a kit or fully assembled.
- Just-in-time delivery

TAILORED TO YOUR PROCESS

- manufactured using Extrusion and Fastening Technology in the 40 mm series
- 14 mm uniform T-slot in all extrusions
- Handles, stops, and accessories can be added without drilling or milling

SAFETY

- Swivel castors with brakes ensure stability
- Stop plates secure the load
- Extrusion ends covered with End Caps

RETROFIT INSTEAD OF BUYING NEW

- Can be expanded at any time using the 14 mm uniform T-slot.
- Reposition the accessories when the process changes
- You can use the same parts as in your system

SAVE TIME, CUT COST

- The same supplier for systems and factory equipment
- Predictable catalog price instead of a custom design
- Impressive delivery times
